

Horizon Europe Project Workshop: Freshwater Consumption in the Region of Istria - Networking for Solutions

Invitation

The Euro-Mediterranean University (EMUNI) is leading The Change Hubs for Ecosystemic Social Solutions (CHESS) project, funded by the Horizon Europe Programme, which aims to explore and apply new approaches to the challenges we face as a society. Under a “learning by doing” approach, the CHESS project intends to create tools and opportunities to strengthen cooperation between stakeholders. For Slovenia, EMUNI is focusing on the sustainable blue economy and its third workshop will be on the challenge presented by freshwater consumption in the region of Istria, bringing together stakeholders from Croatia, Slovenia, and Italy. You are among a number of stakeholders invited to participate in the workshop at the EMUNI University premises, Kidričevo nabrežje 2, Piran, Slovenia on 14 October 2024 from 10.30 – 16.00.

Agenda

| | |
|---------------|--|
